

SMART Board™ 600i interactive whiteboard for education

This fully integrated solution from SMART Technologies™, the market leading interactive whiteboard provider for education, enables teachers to create truly extraordinary lessons at the touch of a button. Designed by teachers, for teachers, the SMART Board 600i for education combines a short-throw projector and an interactive whiteboard to offer a cost effective solution for the classroom.

Stress-free teaching

The entire system turns on or off with the touch of a button, making it quick and easy to start up at the beginning of a lesson and to shut down when the class ends. The control panel also allows teachers to add and switch between classroom peripherals, such as laptops, DVD players and digital cameras, without the need for a remote control.

Peace of mind

This secure and robust solution has been tried and tested in the classroom. The collapsible boom feature helps to protect from deliberate or accidental damage, allowing for quick serviceability with one affordable replacement part.

Time saving

Combined with SMART's award-winning Notebook™ collaborative learning software and SMART Ideas™ concept mapping software, the SMART Board 600i for education offers teachers access to thousands of digital images, templates, drawing tools and interactive and educational content. With a comprehensive resources portfolio in one place, the solution saves on lesson planning time, allowing teachers more time to teach.

Features & benefits

Enriched lessons

High levels of brightness and contrast, plus true colour make video, data and digital images appear clear and crisp from anywhere in the room, allowing everyone in the class to enjoy truly captivating, multimedia enriched lessons. By adding optional speakers and a height-adjustable wall mount, the SMART Board 600i for education turns into a complete multimedia centre where every student can see, hear and participate.

Cost effective installation

With the new SMART Board 600i for education, installation is even easier. The projector is wall mounted directly above the interactive whiteboard, eliminating the need for additional complicated wiring or ceiling mounting. The placement of the projector also reduces the appearance of shadows and eliminates glare.

Accessible to all ages

With an optional, easy-to-operate height-adjustable wall mount, the SMART 600i for education is accessible to children and adults of all ages.

No hidden costs

The enclosed projector engine does not have a filter, eliminating the need for regular maintenance. Once the initial financial outlay is made, there are no additional maintenance costs.

Ongoing support

With a free technical helpline available*, teachers are provided with dedicated technical assistance from initial specification through to installation, and ongoing support. The solution comes with a three-year onsite warranty, which is upgradable to an additional two years on the board upon product registration.
